

St Just-in-Penwith Town Council

4 October 2010

St Just & Pendeen Sustainable Energy Community Public Meeting – Tuesday 21st October 2010

Present: Jackie Packer; Rachel Ewer; Bill East; Hugh Taylor; Sandy Angove; Sue James; Dot Stevens; Frances Rippon; Zoe Cocksedge; Dave Stevens; Terry Porter & Rob Pickering (CEP)

Some of the ideas that came out of our discussion were:

- Car Sharing scheme
- Community stew house meetings (Haybox)
- Community Wind Turbine
- Community Project/ Social Enterprise to do cheap mass (50-100) solar thermal installations
- Volunteer Home Energy Advisors to help people identify their options
- DIY dry lining project aimed at the large number of solid walled properties

Agreed Action from the Meeting:

Rob Pickering to draft a short questionnaire / consultation leaflet to be circulated via Outreach etc.

Dot Stevens offered to leaflet Botallack with questionnaire.

Zoe Cocksedge offered to stand outside of the Coop if needed to raise profile.

Rob Pickering to also draft an article to go into the Pendeen Outreach to accompany the questionnaire.

There did seem to be clear support from most of those present for exploring the development of a community wind turbine(s). Rob Pickering will shortly circulate 2 or 3 dates for a potential first meeting for anyone interested in drawing up a plan of action to research this.

If any of the other ideas grab you and you'd like to work Rob on developing a project do please get in contact with him.

In addition, are a couple of interesting links www.tresoc.com and www.energy4all.co.uk
