

Boost Your Digital Skills

Cornwall Neighbourhoods for Change (CN4C) and Digital Peninsula Network (DPN) are working in partnership to deliver a 3-year project, *Digital Boost Cornwall*.

The project will provide individuals and businesses across West Cornwall with access to free digital skills training and support for job seeking as well as upskilling and hiring additional staff for businesses.

What is *Digital Boost Cornwall*?

This project will help individuals across West Cornwall develop valuable skills in digital work practices (including remote working tools, using social media for employment and business, building websites, etc.) to improve their chances of gaining sustainable, or more advanced, employment.

Digital Boost Cornwall will help businesses achieve their business objectives through attending one of our digital skills business courses and access to a thirteen-week 50% wage subsidy to employ an unemployed/inactive individual who has undertaken digital training (subject to eligibility).

To find out how *Digital Boost Cornwall* can support you call Liz on 01209 310624 or email edigweed@cn4c.org.uk, to book an appointment.
